(a) The Department of Environmental Quality shall coordinate an intradepartmental effort to develop scientific protocols to respond to significant fish kill events utilizing staff from the Division of Water Resources, Division of Marine Fisheries, Department of Health and Human Services, Wildlife Resources Commission, the scientific community, and other agencies, as necessary. In developing these protocols, the Department of Environmental Quality shall address the unpredictable nature of fish kills caused by both natural and man-made factors. The protocols shall contain written procedures to respond to significant fish kill events including:

- (1) Developing a plan of action to evaluate the impact of fish kills on public health and the environment.
- (2) Responding to fish kills within 24 hours.
- (3) Investigating and collecting data relating to fish kill events.

- (4) Summarizing and distributing fish kill information to participating agencies, scientists and other interested parties.
- (b) The Secretary of Environmental Quality shall take all necessary and appropriate steps to effectively carry out the purposes of this Part including:
  - (1) Providing adequate training for fish kill investigators.
  - (2) Taking immediate action to protect public health and the environment.
  - (3) Cooperating with agencies, scientists, and other interested parties, to help determine the cause of the fish kill.

**§ 143B-279.8. Coastal Habitat Protection Plans.**

(a) The Department shall coordinate the preparation of draft Coastal Habitat Protection Plans for critical fisheries habitats. The goal of the Plans shall be the long-term enhancement of coastal fisheries associated with each coastal habitat identified in subdivision (1) of this subsection. The Department shall use the staff of those divisions within the Department that have jurisdiction over marine fisheries, water quality, and coastal area management in the preparation of the Coastal Habitat Protection Plans and shall request assistance from other federal and State agencies as necessary. The plans shall:

- (1) Describe and classify biological systems in the habitats, including wetlands, fish spawning grounds, estuarine or aquatic endangered or threatened species, primary or secondary nursery areas, shellfish beds, submerged aquatic vegetation (SAV) beds, and habitats in outstanding resource waters.
- (2) Evaluate the function, value to coastal fisheries, status, and trends of the habitats.
- (3) Identify existing and potential threats to the habitats and the impact on coastal fishing.
- (4) Recommend actions to protect and restore the habitats.

(b) Once a draft Coastal Habitat Protection Plan has been prepared, the chairs of the Coastal Resources Commission, the Environmental Management Commission, and the Marine Fisheries Commission shall each appoint two members of the commission he or she chairs to a six-member review committee. The six-member review committee, in consultation with the Department, shall review the draft Plan and may revise the draft Plan on a consensus basis. The draft Plan, as revised by the six-member review committee, shall then be submitted to the Coastal Resources Commission, the Environmental Management Commission, and the Marine Fisheries Commission, each of which shall independently consider the Plan for adoption. If any of the three commissions is unable to agree to any aspect of a Plan, the chair of each commission shall refer that aspect of the Plan to a six-member conference committee to facilitate the resolution of any differences. The six-member conference committee shall be appointed in the same manner as a six-member review committee and may include members of the six-member review committee that reviewed the Plan. Each final Coastal Habitat Protection Plan shall consist of those provisions adopted by all three commissions. The three commissions shall review and revise each Coastal Habitat Protection Plan at least once every five years.

(c) In carrying out their powers and duties, the Coastal Resources Commission, the Environmental Management Commission, and the Marine Fisheries Commission shall ensure, to

the maximum extent practicable, that their actions are consistent with the Coastal Habitat Protection Plans as adopted by the three commissions. The obligation to act in a manner consistent with a Coastal Habitat Protection Plan is prospective only and does not oblige any commission to modify any rule adopted, permit decision made, or other action taken prior to the adoption or revision of the Coastal Habitat Protection Plan by the three commissions. The Coastal Resources Commission, the Environmental Management Commission, and the Marine Fisheries Commission shall adopt rules to implement Coastal Habitat Protection Plans in accordance with Chapter 150B of the General Statutes.

(d) If any of the three commissions concludes that another commission has taken an action that is inconsistent with a Coastal Habitat Protection Plan, that commission may request a written explanation of the action from the other commission. A commission shall provide a written explanation: (i) upon the written request of one of the other two commissions, or (ii) upon its own motion if the commission determines that it must take an action that is inconsistent with a Coastal Habitat Protection Plan.

(e) The Coastal Resources Commission, the Environmental Management Commission, and the Marine Fisheries Commission shall report to the Joint Legislative Oversight Committee on Agriculture and Natural and Economic Resources, the Fiscal Research Division, and the Environmental Review Commission on progress in developing and implementing the Coastal Habitat Protection Plans, including the extent to which the actions of the three commissions are consistent with the Plans, on or before September 1 of each year in which any significant revisions to the Plans are made.

(f) Repealed by Session Laws 2017-10, s. 4.11(b), effective May 4, 2017. (1997-400, s. 3.1; 1997-443, s. 11A.119(b); 2011-291, ss. 2.52, 2.53; 2012-201, s. 6; 2015-241, s. 14.30(v); 2017-10, ss. 4.11(a), (b); 2017-57, s. 14.1(m).)

#### **§ 143B-279.9. Land-use restrictions may be imposed to reduce danger to public health at contaminated sites.**

(a) In order to reduce or eliminate the danger to public health or the environment posed by the presence of contamination at a site, an owner, operator, or other responsible party may impose restrictions on the current or future use of the real property comprising any part of the site where the contamination is located if the restrictions meet the requirements of this section. The restrictions must be agreed to by the owner of the real property, included in a remedial action plan for the site that has been approved by the Secretary, and implemented as a part of the remedial action program for the site. The Secretary may approve restrictions included in a remedial action plan in accordance with standards that the Secretary determines to be applicable to the site. Except as provided in subsection (b) of this section, if the remedial action is risk-based or will not require that the site meet unrestricted use standards, the remedial action plan must include an agreement by the owner, operator, or other responsible party to record approved land-use restrictions that meet the requirements of this section as provided in G.S. 143B-279.10 or G.S. 143B-279.11, whichever applies. Restrictions may apply to activities on, over, or under the land, including, but not limited to, use of groundwater, building, filling, grading, excavating, and mining. Any approved restriction shall be enforced by any owner of the land, operator of the facility, or other party responsible for the contaminated site. Any land-use restriction may also be enforced by the Department through the remedies provided by any provision of law that is implemented or enforced by the Department or by means of a civil action. The Department may enforce any land-use restriction without first having exhausted any available administrative remedies. A land-use restriction may also be

enforced by any unit of local government having jurisdiction over any part of the site. A land-use restriction shall not be declared unenforceable due to lack of privity of estate or contract, due to lack of benefit to particular land, or due to lack of any property interest in particular land. Any person who owns or leases a property subject to a land-use restriction under this Part shall abide by the land-use restriction.

(b) The definitions set out in G.S. 143-215.94A apply to this subsection. A remedial action plan for the cleanup of environmental damage resulting from a discharge or release of petroleum from an underground storage tank pursuant to Part 2A of Article 21A of Chapter 143 of the General Statutes, other petroleum sources, or from an aboveground storage tank pursuant to Part 7 of Article 21A of Chapter 143 of the General Statutes must include an agreement by the owner, operator, or other party responsible for the discharge or release of petroleum to record a notice of any applicable land-use restrictions that meet the requirements of this subsection as provided in G.S. 143B-279.11. All of the provisions of this section shall apply except as specifically modified by this subsection and G.S. 143B-279.11. Any restriction on the current or future use of real property pursuant to this subsection shall be enforceable only with respect to: (i) real property on which the source of contamination is located and (ii) any real property on which contamination is located at the time the remedial action plan is approved and that was owned or controlled by any owner or operator of the underground storage tank or other responsible party at the time the discharge or release of petroleum is discovered or reported or at any time thereafter. No restriction on the current or future use of real property shall apply to any portion of any parcel or tract of land on which contamination is not located. This subsection shall not be construed to require any person to record any notice of restriction on the current or future use of real property other than the real property described in this subsection. For purposes of this subsection and G.S. 143B-279.11, the Secretary may restrict current or future use of real property only as set out in any one or more of the following subdivisions:

- (1) Where soil contamination will remain in excess of unrestricted use standards, the property may be used for a primary or secondary residence, school, daycare center, nursing home, playground, park, recreation area, or other similar use only with the approval of the Department.
- (2) Where soil contamination will remain in excess of unrestricted use standards and the property is used for a primary or secondary residence that was constructed before the release of petroleum that resulted in the contamination is discovered or reported, the Secretary may approve alternative restrictions that are sufficient to reduce the risk of exposure to contaminated soils to an acceptable level while allowing the real property to continue to be used for a residence.
- (3) Where groundwater contamination will remain in excess of unrestricted use standards, installation or operation of any well usable as a source of water shall be prohibited.
- (4) Any restriction on the current or future use of the real property that is agreed upon by both the owner of the real property and the Department.

With respect to sites contaminated by the discharge or release of petroleum from an aboveground storage tank, or another petroleum source, from which contamination has migrated to off-site properties, as that term is defined under G.S. 130A-310.65(3a), the imposition of restrictions on the current or future use of real property on such a site shall only be allowed if the

Department has determined that the requirements of G.S. 143-215.104AA or G.S. 130A-310.73A, as applicable, have been satisfied for the site.

(c) This section does not alter any right, duty, obligation, or liability of any owner, operator, or other responsible party under any other provision of law.

(d) As used in this section:

- (1) "Unrestricted use standards" means generally applicable standards, guidance, or established methods governing contaminants that are established by statute or adopted, published, or implemented by the Environmental Management Commission, the Commission for Public Health, or the Department. Cleanup or remediation of real property to unrestricted use standards means that the property is restored to a condition such that the property and any use that is made of the property does not pose a danger or risk to public health, the environment, or users of the property that is significantly greater than that posed by use of the property prior to its having been contaminated.
- (2) "Risk-based", when used in connection with cleanup, remediation, or similar terms, means cleanup or remediation of contamination of real property to a level that, although not in compliance with unrestricted use standards, does not pose a significant danger or risk to public health, the environment, or users of the real property so long as the property remains in the condition and is used in a manner that is consistent with the assumptions as to the condition and use of the property on which the determination that the level of risk is acceptable is based. (1999-198, s. 1; 2000-51, s. 1; 2001-384, ss. 1, 12; 2002-90, s. 1; 2007-182, s. 2; 2017-209, s. 3(a); 2018-114, s. 18(a).)

#### **§ 143B-279.10. Recordation of contaminated sites.**

(a) The owner of the real property on which a site is located that is subject to current or future use restrictions approved as provided in G.S. 143B-279.9(a) shall submit to the Department a survey plat as required by this section within 180 days after the owner is notified to do so. The survey plat shall identify areas designated by the Department, shall be prepared and certified by a professional land surveyor, and shall be entitled "NOTICE OF CONTAMINATED SITE". Where a contaminated site is located on more than one parcel or tract of land, a composite map or plat showing all parcels or tracts may be recorded. The Notice shall include a legal description of the site that would be sufficient as a description in an instrument of conveyance, shall meet the requirements of G.S. 47-30 for maps and plats, and shall identify:

- (1) The location and dimensions of any disposal areas and areas of potential environmental concern with respect to permanently surveyed benchmarks.
- (2) The type, location, and quantity of contamination known to the owner of the site to exist on the site.
- (3) Any restriction approved by the Department on the current or future use of the site.

(b) The Department shall review the proposed Notice to determine whether the Notice meets the requirements of this section and rules adopted to implement this section, and shall provide the owner of the site with a notarized copy of the approved Notice. After the Department approves the Notice, the owner of the site shall file a notarized copy of the approved Notice in the register of deeds office in the county or counties in which the land is located within 15 days of the date on which the owner receives approval of the Notice from the Department.

(c) Repealed by Session Laws 2012-18, s. 1.22, effective July 1, 2012.

(d) In the event that the owner of the site fails to submit and file the Notice required by this section within the time specified, the Secretary may prepare and file the Notice. The costs thereof may be recovered by the Secretary from any responsible party. In the event that an owner of a site who is not a responsible party submits and files the Notice required by this section, the owner may recover the reasonable costs thereof from any responsible party.

(e) When a contaminated site that is subject to current or future land-use restrictions is sold, leased, conveyed, or transferred, the deed or other instrument of transfer shall contain in the description section, in no smaller type than that used in the body of the deed or instrument, a statement that the property is a contaminated site and a reference by book and page to the recordation of the Notice.

(f) A Notice of Contaminated Site filed pursuant to this section shall, at the request of the owner of the land, be cancelled by the Secretary after the contamination has been eliminated or remediated to unrestricted use standards. If requested in writing by the owner of the land and if the Secretary concurs with the request, the Secretary shall send to the register of deeds of each county where the Notice is recorded a statement that the contamination has been eliminated, or that the contamination has been remediated to unrestricted use standards, and request that the Notice be cancelled of record. The Secretary's statement shall contain the names of the owners of the land as shown in the Notice and reference the plat book and page where the Notice is recorded.

(g) This section does not apply to the cleanup pursuant to a remedial action plan that addresses environmental damage resulting from a discharge or release of petroleum from an underground storage tank pursuant to Part 2A of Article 21A of Chapter 143 of the General Statutes.

(h) The definitions set out in G.S. 143B-279.9 apply to this section.

(i) If a site subject to the requirements of this section is remediated pursuant to the requirements of Part 8 of Article 9 of Chapter 130A of the General Statutes, a Notice of Restricted Use may be prepared and filed in accordance with G.S. 130A-310.71(e) in lieu of a Notice of Residual Contamination or a Notice of Contaminated Site. (1999-198, s. 1; 2000-51, s. 2; 2001-384, s. 2; 2002-90, s. 2; 2012-18, s. 1.22; 2015-286, s. 4.7(e); 2021-158, s. 7(c).)

**§ 143B-279.11. Recordation of residual petroleum from underground or aboveground storage tanks or other sources.**

(a) The definitions set out in G.S. 143-215.94A and G.S. 143B-279.9 apply to this section. This section applies only to a cleanup pursuant to a remedial action plan that addresses environmental damage resulting from a discharge or release of petroleum from an underground storage tank pursuant to Part 2A of Article 21A of Chapter 143 of the General Statutes or from an aboveground storage tank or other petroleum source pursuant to Part 7 of Article 21A of Chapter 143 of the General Statutes.

(b) The owner, operator, or other person responsible for a discharge or release of petroleum from an underground storage tank, aboveground storage tank, or other petroleum source shall prepare and submit to the Department a proposed Notice that meets the requirements of this section. The proposed Notice shall be submitted to the Department (i) before the property is conveyed, or (ii) when the owner, operator, or other person responsible for the discharge or release requests that the Department issue a determination that no further action is required under the remedial action plan, whichever first occurs. The Notice shall be entitled "NOTICE OF RESIDUAL PETROLEUM". The Notice shall include a description that would be sufficient as a

description in an instrument of conveyance of the (i) real property on which the source of contamination is located and (ii) any real property on which contamination is located at the time the remedial action plan is approved and that was owned or controlled by any owner or operator of the underground storage tank, aboveground storage tank, or other petroleum source, or other responsible party at the time the discharge or release of petroleum is discovered or reported or at any time thereafter. The Notice shall identify the location of any residual petroleum known to exist on the real property at the time the Notice is prepared. The Notice shall also identify the location of any residual petroleum known, at the time the Notice is prepared, to exist on other real property that is a result of the discharge or release. The Notice shall set out any restrictions on the current or future use of the real property that are imposed by the Secretary pursuant to G.S. 143B-279.9(b) to protect public health, the environment, or users of the property.

(c) If the contamination is located on more than one parcel or tract of land, the Department may require that the owner, operator, or other person responsible for the discharge or release prepare a composite map or plat that shows all parcels or tracts. If the contamination is located on one parcel or tract of land, the owner, operator, or other person responsible for the discharge or release may prepare a map or plat that shows the parcel but is not required to do so. A map or plat shall be prepared and certified by a professional land surveyor, shall meet the requirements of G.S. 47-30, and shall be submitted to the Department for approval. When the Department has approved a map or plat, it shall be recorded in the office of the register of deeds and shall be incorporated into the Notice by reference.

(d) The Department shall review the proposed Notice to determine whether the Notice meets the requirements of this section and rules adopted to implement this section and shall provide the owner, operator, or other person responsible for the discharge or release of petroleum from an underground storage tank, aboveground storage tank, or other petroleum source with a notarized copy of the approved Notice. After the Department approves the Notice, the owner, operator, or other person responsible for the discharge or release of petroleum from an underground storage tank, aboveground storage tank, or other petroleum source shall file a notarized copy of the approved Notice in the register of deeds office in the county or counties in which the real property is located (i) before the property is conveyed or (ii) within 30 days after the owner, operator, or other person responsible for the discharge or release receives notice from the Department that no further action is required under the remedial action plan, whichever first occurs. If the owner, operator, or other person responsible for the discharge or release fails to file the Notice as required by this section, any determination by the Department that no further action is required is void. The owner, operator, or other person responsible for the discharge or release, may record the Notice required by this section without the agreement of the owner of the real property. The owner, operator, or other person responsible for the discharge or release shall submit a certified copy of the Notice as filed in the register of deeds office to the Department.

(e) Repealed by Session Laws 2012-18, s. 1.23, effective July 1, 2012.

(f) In the event that the owner, operator, or other person responsible for the discharge or release fails to submit and file the Notice required by this section within the time specified, the Secretary may prepare and file the Notice. The costs thereof may be recovered by the Secretary from any responsible party. In the event that an owner of the real property who is not a responsible party submits and files the Notice required by this section, the owner may recover the reasonable costs thereof from any responsible party.

(g) A Notice filed pursuant to this section shall, at the request of the owner of the real property, be cancelled by the Secretary after the residual petroleum has been eliminated or

remediated to unrestricted use standards. If requested in writing by the owner of the land, the Secretary shall send to the register of deeds of each county where the Notice is recorded a statement that the residual petroleum has been eliminated, or that the residual petroleum has been remediated to unrestricted use standards, and request that the Notice be cancelled of record. The Secretary's statement shall contain the names of the owners of the land as shown in the Notice and reference the plat book and page where the Notice is recorded.

(h) With respect to sites contaminated by the discharge or release of petroleum from an aboveground storage tank, or another petroleum source, from which contamination has migrated to off-site properties, as that term is defined under G.S. 130A-310.65(3a), the provisions of this section shall only apply if the Department has determined that the requirements of G.S. 143-215.104AA or G.S. 130A-310.73A, as applicable, have been satisfied for the site. (2001-384, s. 3; 2002-90, ss. 3-5; 2012-18, s. 1.23; 2017-209, s. 3(b); 2018-114, s. 18(b).)

#### **§ 143B-279.12. One-stop permits for certain environmental permits.**

(a) The Department of Environmental Quality shall establish a one-stop environmental permit application assistance and tracking system program for all its regional offices. The Department shall provide to each person who submits an application for any environmental permit subject to this section to any regional office a time frame within which that applicant may expect a final decision regarding the issuance or denial of the permit. The Department shall identify the environmental permits that are subject to this section. The procedure regulating the time frame estimates and sanction for failing to honor the time frame shall be as set out in subsections (b) and (c) of this section.

(b) Upon receipt of a complete application for an environmental permit, the Department of Environmental Quality shall provide to the applicant a good faith estimate of the date by which the Department expects to make the final decision of whether to issue or deny the permit.

(c) Unless otherwise provided by law, when an applicant has provided to the Department of Environmental Quality the information and documentation required and requested by the Department and the Department fails to issue or deny the permit within 60 days of the date projected by the Department for the final decision of whether to issue or deny the permit, the permit shall be automatically granted to the applicant. This subsection does not apply when an applicant submits a substantial amendment to its application after the Department has provided the applicant the projected time frame as required by this section. This subsection does not apply when an applicant agrees to receive a final decision from the Department more than 60 days from the date projected by the Department under subsection (b) of this section.

(d) The Department of Environmental Quality shall track the time required to process each complete environmental permit application that is subject to this section. The Department shall compare the time in which the permit was issued or denied with the projected time frame provided to the applicant by the Department as required by this section. The Department shall identify each permit that was issued or denied more than 90 days after receipt of a complete application by the Department and shall document the reasons for the delayed action.

(e) Repealed by Session Laws 2008-198, s. 10.1, effective August 8, 2008.

(f) The Department may adopt temporary rules to implement this section. (2004-124, s. 12.12(a); 2006-79, s. 14; 2008-198, s. 10.1; 2015-241, s. 14.30(u).)

#### **§ 143B-279.13. Express permit and certification reviews.**

(a) The Department of Environmental Quality shall develop an express review program to provide express permit and certification reviews in all of its regional offices. Participation in the express review program is voluntary, and the program shall be supported by the fees determined pursuant to subsection (b) of this section. The Department of Environmental Quality shall determine the project applications to review under the express review program from those who request to participate in the program. The express review program may be applied to any one or all of the permits, approvals, or certifications in the following programs: the erosion and sedimentation control program, the coastal management program, and the water quality programs, including water quality certifications and stormwater management. The express review program shall focus on the following permits or certifications:

- (1) Stormwater permits under Part 1 of Article 21 of Chapter 143 of the General Statutes.
- (2) Stream origination certifications under Article 21 of Chapter 143 of the General Statutes.
- (3) Water quality certification under Article 21 of Chapter 143 of the General Statutes.
- (4) Erosion and sedimentation control permits under Article 4 of Chapter 113A of the General Statutes.
- (5) Permits under the Coastal Area Management Act (CAMA), Part 4 of Article 7 of Chapter 113A of the General Statutes.

(a1) The Department of Environmental Quality shall have the authority to create express permitting options for programs in addition to those listed in subsection (a) of this section where it deems there to be a need or where it determines an express permitting option would create greater efficiencies for the permitting process.

(b) The Department of Environmental Quality shall set the fees for express application review under the express review program at a level sufficient to cover all program expenses. Notwithstanding G.S. 143-215.3D, the maximum permit application fee to be charged under subsection (a) of this section for the express review of a project application requiring all of the permits under subdivisions (1) through (5) of subsection (a) of this section shall not exceed five thousand five hundred dollars (\$5,500). Notwithstanding G.S. 143-215.3D, the maximum permit application fee to be charged for the express review of a project application requiring all of the permits under subdivisions (1) through (4) of subsection (a) of this section shall not exceed four thousand five hundred dollars (\$4,500). Notwithstanding G.S. 143-215.3D, the maximum permit application fee charged for the express review of a project application for any other combination of permits under subdivisions (1) through (5) of subsection (a) of this section shall not exceed four thousand dollars (\$4,000). As set forth in subsection (a1) of this section, express review of a project application involving additional permits or certifications issued by the Department of Environmental Quality other than those under subdivisions (1) through (5) of subsection (a) of this section may be allowed by the Department, and, notwithstanding G.S. 143-215.3D or any other statute or rule that sets a permit fee, the maximum permit application fee charged for the express review of a project application that includes a permit, approval, or certification designated for express review under subsection (a1) of this section shall not exceed four thousand dollars (\$4,000), plus one hundred fifty percent (150%) of the fee that would otherwise apply by statute or rule for that particular permit, approval, or certification. Additional fees, not to exceed fifty percent (50%) of the original permit application fee under this section, may be charged for subsequent reviews due to the insufficiency of the permit applications. The Department of Environmental

Quality may establish the procedure by which the amount of the fees under this subsection is determined, and the fees and procedures are not rules under G.S. 150B-2(8a) for the express review program under this section.

(c) Repealed by Session Laws 2008-198, s. 10.2, effective August 8, 2008. (2005-276, s. 12.2(a); 2008-198, s. 10.2; 2015-241, s. 14.30(u); 2023-134, s. 12.13(a).)

#### **§ 143B-279.14. Express Review Fund.**

The Express Review Fund is created as a special nonreverting fund. All fees collected under G.S. 143B-279.13 shall be credited to the Express Review Fund. The Express Review Fund shall be used for the costs of implementing the express review program under G.S. 143B-279.13 and the costs of administering the program, including the salaries and support of the program's staff. If the express review program is abolished, the funds in the Express Review Fund shall be credited to the General Fund. (2005-276, s. 12.2(a).)

#### **§ 143B-279.15: Repealed by Session Laws 2015-286, s. 4.12(c), effective October 22, 2015.**

#### **§ 143B-279.16. Civil penalty assessments.**

(a) The purpose of this section is to provide to the person receiving a notice of violation of an environmental statute or an environmental rule a greater opportunity to understand what corrective action is needed, receive technical assistance from the Department of Environmental Quality, and to take the needed corrective action. It is also the purpose of this section to provide to the person receiving the notice of violation a greater opportunity for informally resolving matters involving any such violation.

(b) In order to fulfill the purpose set forth in subsection (a) of this section, the Department of Environmental Quality shall, effective July 1, 2011, extend the period of time by 10 days between the time the violator is sent a notice of violation of an environmental statute or an environmental rule and the subsequent date the violator is sent an assessment of the civil penalty for the violation. (2011-145, s. 13.6; 2015-241, s. 14.30(u).)

#### **§ 143B-279.17. Tracking and report on permit processing times.**

The Department of Environmental Quality shall track the time required to process all permit applications in the One-Stop for Certain Environmental Permits Programs established by G.S. 143B-279.12 and the Express Permit and Certification Reviews established by G.S. 143B-279.13 that are received by the Department. The processing time tracked shall include (i) the total processing time from when an initial permit application is received to issuance or denial of the permit and (ii) the processing time from when a complete permit application is received to issuance or denial of the permit. No later than January 1 of each odd-numbered year, the Department shall report to the Joint Legislative Oversight Committee on Agriculture and Natural and Economic Resources, the Fiscal Research Division of the General Assembly, and the Environmental Review Commission on the permit processing times required to be tracked pursuant to this section. The Department shall submit this report with the report required by G.S. 143-215.3A(c) as a single report. (2012-187, s. 13(a); 2015-241, s. 14.30(u); 2017-10, s. 4.12(b); 2017-57, s. 14.1(n).)

#### **§ 143B-279.18. Right to apply and obtain permits.**

Except to the extent required by federal or State law, the Department of Environmental Quality shall not refuse to accept an application for a permit, authorization, or certification or refuse to issue any permit, authorization, or certificate based solely on the failure of an applicant to obtain another permit, authorization, or certification required for the same project. For purposes of this section, failure to obtain a permit, authorization, or certification shall not include denial of the permit, authorization, or certification by the Department based on the standards for approval of the permit, authorization, or certification provided by law. (2023-134, s. 12.10(a).)

**§ 143B-279.19. Quadriennial adjustment of certain fees and rates.**

(a) Adjustment for Legislatively Mandated Salaries and Benefits. – Beginning July 1, 2025, and every four years thereafter, the Department shall adjust the fees and rates imposed pursuant to the statutes listed in this subsection in accordance with the Consumer Price Index computed by the Bureau of Labor Statistics during the prior two bienniums. These strategies may include, but are not limited to, additional monitoring, effluent limitations, supplemental standards or classifications, best management practices, protective buffers, schedules of compliance, and the establishment of and delegations to intergovernmental basinwide groups.

**§ 143B-282.1. Environmental Management Commission – quasi-judicial powers; procedures.**

(a) With respect to those matters within its jurisdiction, the Environmental Management Commission shall exercise quasi-judicial powers in accordance with the provisions of Chapter

150B of the General Statutes. This section and any rules adopted by the Environmental Management Commission shall govern such proceedings:

- (1) Exceptions to recommended decisions in contested cases shall be filed with the Secretary within 30 days of the receipt by the Secretary of the official record from the Office of Administrative Hearings, unless additional time is allowed by the chairman of the Commission.
- (2) Oral arguments by the parties may be allowed by the chairman of the Commission upon request of the parties.
- (3) Deliberations of the Commission shall be conducted in its public meeting unless the Commission determines that consultation with its counsel should be held in a closed session pursuant to G.S. 143-318.11.

(b) The final agency decision in contested cases that arise from civil penalty assessments shall be made by the Commission. In the evaluation of each violation, the Commission shall recognize that harm to the natural resources of the State arising from the violation of standards or limitations established to protect those resources may be immediately observed through damaged resources or may be incremental or cumulative with no damage that can be immediately observed or documented. Penalties up to the maximum authorized may be based on any one or combination of the following factors:

- (1) The degree and extent of harm to the natural resources of the State, to the public health, or to private property resulting from the violation;
- (2) The duration and gravity of the violation;
- (3) The effect on ground or surface water quantity or quality or on air quality;
- (4) The cost of rectifying the damage;
- (5) The amount of money saved by noncompliance;
- (6) Whether the violation was committed willfully or intentionally;
- (7) The prior record of the violator in complying or failing to comply with programs over which the Environmental Management Commission has regulatory authority; and
- (8) The cost to the State of the enforcement procedures.

(c) The chairman shall appoint a Committee on Civil Penalty Remissions from the members of the Commission. No member of the Committee on Civil Penalty Remissions may hear or vote on any matter in which he has an economic interest. The Committee on Civil Penalty Remissions shall make the final agency decision on remission requests. In determining whether a remission request will be approved, the Committee shall consider the recommendation of the Secretary and the following factors:

- (1) Whether one or more of the civil penalty assessment factors in subsection (b) of this section were wrongly applied to the detriment of the petitioner;
- (2) Whether the violator promptly abated continuing environmental damage resulting from the violation;
- (3) Whether the violation was inadvertent or a result of an accident;
- (4) Whether the violator had been assessed civil penalties for any previous violations;
- (5) Whether payment of the civil penalty will prevent payment for the remaining necessary remedial actions.

(d) The Committee on Civil Penalty Remissions may remit the entire amount of the penalty only when the violator has not been assessed civil penalties for previous violations, and when payment of the civil penalty will prevent payment for the remaining necessary remedial actions.

(e) If any civil penalty has not been paid within 30 days after the final agency decision or court order has been served on the violator, the Secretary of Environmental Quality shall request the Attorney General to institute a civil action in the Superior Court of any county in which the violator resides or has his or its principal place of business to recover the amount of the assessment.

- (1) Whether one or more of the civil penalty assessment factors in subsection (b) of this section were wrongly applied to the detriment of the petitioner.
- (2) Whether the violator promptly abated continuing environmental damage resulting from the violation.
- (3) Whether the violation was inadvertent.
- (4) Whether the violator had been assessed civil penalties for any previous violations.
- (5) Whether payment of the civil penalty will prevent payment for the remaining necessary remedial actions.

(d) The Committee on Civil Penalty Remissions may remit the entire amount of the penalty only when the violator has not been assessed civil penalties for previous violations and when payment of the civil penalty will prevent payment for the remaining necessary remedial actions.

(e) If any civil penalty has not been paid within 30 days after the final agency decision or court order has been served on the violator, the Secretary of Environmental Quality shall request the Attorney General to institute a civil action in the superior court of any county in which the violator resides or has his or its principal place of business to recover the amount of the assessment.
