1 A JOINT RESOLUTION AUTHORIZING THE ENVIRONMENTAL REVIEW  
2 COMMISSION TO STUDY THE IMPACT OF ENVIRONMENTAL TOXINS AND  
3 CHEMICALS ON HUMAN HEALTH.

4 Whereas, the United States Senate and House of Representatives have introduced  
5 the Safe Chemicals Act of 2010 to ensure that health risks from chemicals are adequately  
6 understood and managed; and

7 Whereas, awareness and understanding of the complexity of the environmental  
8 impacts on human health are still growing; and

9 Whereas, environmental factors have been implicated in the onset and exacerbation  
10 of numerous chronic and acute health problems such as diabetes, infertility, and kidney disease;  
11 and

12 Whereas, there are growing suspicions in the scientific community that one of the  
13 causes of the growing epidemic of autism spectrum disorders (ASDs) may be toxins in the  
14 environment; and

15 Whereas, a growing number of studies indicate a strong link between environmental  
16 exposures and cancer; and

17 Whereas, these diseases and disorders occur in all racial, ethnic, and socioeconomic  
18 groups; and

19 Whereas, the diagnosis and treatment of these diseases and disorders place a huge  
20 financial burden on families, health insurers, and public assistance programs; Now, therefore,  
21 Be it resolved by the House of Representatives, the Senate concurring:

22 **SECTION 1.** The Environmental Review Commission, with the assistance of the  
23 Department of Environment and Natural Resources and the Department of Health and Human  
24 Services, may study the impact of environmental toxins and chemicals on human health and  
25 report its findings and recommendations, including any legislative proposals, to the General  
26 Assembly no later than the convening of the 2012 Regular Session of the 2011 General  
27 Assembly. In the conduct of this study, the Commission shall:

- 28 (1) Survey legislation enacted in other states that bans or limits the use of  
29 environmental toxins and chemicals and assess the effectiveness of such  
30 legislation.
- 31 (2) Survey how other states have established entities within state government to  
32 review and regulate environmental toxins and chemicals that have been or  
33 will be introduced into the stream of commerce.
- 34 (3) Review incentives that have been proposed or enacted in other states that  
35 promote the growth of the green chemistry industry, including an analysis of  
36 documented environmental, public health, and economic benefits, including  
37 job creation, in those states.

- 1           (4)    Identify current State and federal programs for the review and regulation of  
2           environmental toxins and chemicals and recommend any supplementary  
3           programs the Commission determines to be necessary for the protection of  
4           human health.  
5           (5)    Conduct a cost-benefit and economic impact analysis for any  
6           recommendation made pursuant to this act.  
7           **SECTION 2.** This resolution is effective upon ratification.
