

GENERAL ASSEMBLY OF NORTH CAROLINA

Session 2017

Legislative Incarceration Fiscal Note

BILL NUMBER: House Bill 597 (First Edition)

SHORT TITLE: Willful Injury of Person/Trap in Public Park.

SPONSOR(S): Representatives Bradford, Bert Jones, Zachary, and Clampitt

FISCAL IMPACT SUMMARY:

The proposed bill may have a fiscal impact to address new chargeable offenses being enforced, adjudicated, and having penalties applied to those convicted of the new offenses. However, given that there is no historical data on these new offenses or similar offenses to use as a proxy for predicting the total number of new offenses, the Fiscal Research Division cannot reasonably estimate the total additional costs that may be incurred. The following costs may be incurred for every one person charged and convicted of these crimes:

- Administrative Office of the Courts: \$357 to \$2,017 per disposition
- Indigent Defense Services: \$201 to \$586 per indigent defendant
- Department of Public Safety (DPS) - Prisons: \$0 to \$12,339 per active sentence
- DPS - Community Corrections: Minimum of \$2,516 to \$4,884 per supervised probation sentence

Please see the Assumptions and Methodology section for additional information.

BILL SUMMARY:

This bill creates four new criminal penalties:

- G.S. 14-50.50(b) makes it a Class A1 misdemeanor to willfully and maliciously place a trap in a public park for the purpose of injuring another person.
- G.S. 14-50.50(d) makes the Class A1 misdemeanor a Class I felony if the trap is camouflaged or concealed.
- G.S. 14-50.50(c) makes it a Class H felony if the trap causes physical injury to another person.
- G.S. 14-50.50(d) makes it a Class E felony if the trap inflicts serious injury on another person.

ASSUMPTIONS AND METHODOLOGY:

General

The Sentencing and Policy Advisory Commission prepares prison population projections for each bill containing a criminal penalty. The Commission assumes for such bills that expanding existing or creating new criminal offenses produces no deterrent or incapacitative effect on crime. Therefore, the Fiscal Research Division does not assume deterrent effects for any criminal penalty bill.

S.L. 2011-192 (H.B. 642), the Justice Reinvestment Act (JRA), made changes to North Carolina’s court system, corrections system (both to prisons and probation), and to post-release supervision. All active sentences for felony offenses now result in a minimum of twelve months of post-release supervision (PRS) for B1-E level offenses and a minimum of nine months of PRS for F-I level offenses.

JRA also created the Statewide Misdemeanant Confinement Program (SMCP) for housing misdemeanants with sentences between 90 and 180 days in county jails (misdemeanants with shorter sentences were already the responsibility of the counties). County participation in the program is voluntary. The SMCP pays participating counties for misdemeanants’ housing, transportation, and medical costs. In 2014, the program was expanded to include all misdemeanants with sentences longer than 90 days. The Sentencing and Policy Advisory Commission does not track county jail capacity, so it is not possible to estimate the impact of new or increased misdemeanor penalties on county jails.

Judicial Branch

The Administrative Office of the Courts provides Fiscal Research with a fiscal impact analysis for most criminal penalty bills. For such bills, fiscal impact is typically based on the assumption that court time will increase due to anticipated increases in trials and corresponding increases in workload for judges, clerks, and prosecutors. This increased court time is also expected to result in greater expenditures for jury fees and indigent defense.

The bill creates four new offenses. Because these are new offenses, AOC does not have historical data upon which to estimate the number of charges that might occur. AOC provides estimates of the average cost to the court for a charge by offense class. The table below shows the cost to AOC for each new offense.

| AOC Cost by Offense Class | | |
|---|----------------------|-------------|
| Offense | Offense Class | Cost |
| G.S. 14-50.50 (b) Placing trap in park | Class A1 Misdemeanor | \$357 |
| G.S. 14-50.50 (e) Camouflaged trap | Class I felony | \$455 |
| G.S. 14-50.50 (c) Inflicting injury | Class H felony | \$625 |
| G.S. 14-50.50 (d) Inflicting serious injury | Class E felony | \$2,017 |

The Office of Indigent Defense Services (IDS) has provided Fiscal Research with the frequency and cost of indigent defense services for each level of crime, including the cost differentials for district and superior court with and without a trial and the percentage of cases handled in each category. Fiscal Research used this data to calculate a weighted average of IDS costs. The table below shows the usage rate and the IDS cost for each offense class.

| IDS Cost by Offense Class | | | |
|----------------------------------|----------------------|-------------------|-------------|
| Offense | Offense Class | Usage Rate | Cost |
| G.S. 14-50.50 (b) | Class A1 Misdemeanor | 52% | \$201 |
| G.S. 14-50.50 (e) | Class I felony | 68% | \$333 |
| G.S. 14-50.50 (c) | Class H felony | 78% | \$392 |
| G.S. 14-50.50 (d) | Class E felony | 79% | \$586 |

These estimates assume the appointment of a PAC attorney. In districts that have Public Defender offices, cases may be handled by those offices. In those instances, these costs may not be incurred.

Department of Public Safety – Prisons

This bill creates a new Class A1 misdemeanor offense. The North Carolina Sentencing and Policy Advisory Commission expects no impact on the prison population from this offense because all misdemeanor offenders who receive active sentences will serve them in the local jail.

The chart below depicts the projected inmate population relative to available prison bed capacity system-wide. Capacity projections assume operation at Expanded Operating Capacity,¹ and represent the total number of beds in operation, or authorized for construction or operation as of December 2016.

Based on the most recent population projections and estimated bed capacity, there are surplus prison beds available for the five-year fiscal note horizon and beyond. Therefore, no additional beds will be required unless the projected number of additional inmates resulting from a bill (row four) exceeds the projected number of beds under the inmate population (row three).

| Population Projections and Bed Capacity Five Year Impact | | | | | |
|---|-------------------------|-------------------------|-------------------------|-------------------------|-------------------------|
| | June 30 2018 | June 30 2019 | June 30 2020 | June 30 2021 | June 30 2022 |
| 1. Inmates ² | 37,304 | 37,601 | 37,367 | 37,385 | 37,642 |
| 2. Prison Beds (Expanded Capacity) | 38,373 | 38,373 | 38,373 | 38,373 | 38,373 |

¹ Expanded Operating Capacity (EOC) is: 1) the number of single cells housing one inmate, 2) the number of single cells housing two inmates, and 3) the number of beds in dormitories, allowing between 35 (130% of Standard Operating Capacity) and 50 (SOC) square feet per inmate.

² The Sentencing and Policy Advisory Commission prepares inmate population projections annually. These projections are derived from: historical information on incarceration and release rates under Structured Sentencing; crime rate forecasts by a technical advisory group; probation and offender revocation rates; and the decline (parole and max-outs) of the stock prison population sentenced under prior sentencing acts. Projections were updated in February 2016.

| | | | | | |
|--|------------------------------|-----|-------|-----|-----|
| 3. Beds Over/(Under) Inmate Population | 1,069 | 772 | 1,006 | 988 | 731 |
| 4. <i>Additional Inmates Due to this Bill</i> ³ | No estimate available | | | | |
| 5. <i>Additional Beds Required</i> | | | | | |

Since the bill creates several new felony offenses, the Sentencing Commission does not have any historical data from which to estimate the impact of this bill on the prison population. A threshold analysis is provided when it is not known how many offenders might be convicted and sentenced as a result of the proposed change. For each offense class, the threshold estimate is the number of convictions that result in the need for one prison bed in the first year.

In FY 2015-16, 15% of Class I felony convictions resulted in active sentences, with an average estimated time served of seven months. Nine months of post-release supervision is required upon release from prison following an active sentence or revocation of probation. The following table shows the estimated annual bed impact if there were nine convictions (the threshold) or 20 convictions for this proposed offense per year. The five year estimate takes into account the combination of active sentences and probation and post-release supervision violations resulting in confinement, as well as growth rates adopted by the Sentencing Commission’s Forecasting Technical Advisory Group.

| Estimated Prison Bed Impact Using Threshold Convictions and 20 Convictions Class I Felony | | | | | |
|--|---------------|---------------|---------------|---------------|---------------|
| Convictions | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
| 9 (Threshold) | 1 | 2 | 2 | 2 | 2 |
| 20 | 2 | 4 | 4 | 4 | 4 |

In addition to the capital costs that may be associated with additional bed needs, there are also per diem costs for housing inmates. The cost to add one additional inmate to the prison system is \$15.02 per day, or \$457 per month, which includes the cost of food, clothing, and health care. In FY 2015-16, 15% of Class I felony offenders received active sentences averaging seven months. For every one Class I felony offender receiving an active sentence, the cost to the prison section will be \$3,199 (\$457 monthly cost times seven months).

In FY 2015-16, 35% of Class H felony convictions resulted in active sentences, with an average estimated time served of 11 months. Nine months of post-release supervision is required upon release from prison following an active sentence or revocation of probation. The following table shows the estimated annual bed impact if there were four convictions (the threshold) or 20 convictions for this proposed offense per year. The five year estimate takes into account the combination of active sentences and probation and post-release supervision violations resulting in confinement, as well as growth rates adopted by the Sentencing Commission’s Forecasting Technical Advisory Group.

| Estimated Prison Bed Impact Using Threshold Convictions and 20 Convictions Class H Felony | | | | | |
|--|---------------|---------------|---------------|---------------|---------------|
| Convictions | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
| 4 (Threshold) | 1 | 2 | 2 | 2 | 2 |
| 20 | 7 | 10 | 10 | 10 | 10 |

³ Criminal penalty bills effective December 1, 2016 should not affect prison population and bed needs until FY 2017-18 due to the lag time between offense charge and sentencing - six months on average. No delayed effect is presumed for the Court System.

In addition to the capital costs that may be associated with additional bed needs, there are also per diem costs for housing inmates. The cost to add one additional inmate to the prison system is \$15.02 per day, or \$457 per month, which includes the cost of food, clothing, and health care. In FY 2015-16, 35% of Class H felony offenders received active sentences averaging 11 months. For every one Class H felony offender receiving an active sentence, the cost to the prison section will be \$5,027 (\$457 monthly cost times 11 months).

In FY 2015-16, 63% of Class E felony convictions resulted in active sentences, with an average estimated time served of 27 months. Twelve months of post-release supervision is required upon release from prison following an active sentence or revocation of probation. The following table shows the estimated annual impact if there were two convictions (the threshold) or 20 convictions for this proposed offense per year. The five year estimate takes into account the combination of active sentences and probation and post-release supervision violations resulting in confinement, as well as growth rates adopted by the Sentencing Commission’s Forecasting Technical Advisory Group.

| Estimated Prison Bed Impact Using Threshold Convictions and 20 Convictions Class E Felony | | | | | |
|--|---------------|---------------|---------------|---------------|---------------|
| Convictions | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
| 2 (Threshold) | 1 | 3 | 3 | 3 | 3 |
| 20 | 13 | 28 | 34 | 34 | 35 |

In addition to the capital costs that may be associated with additional bed needs, there are also per diem costs for housing inmates. The cost to add one additional inmate to the prison system is \$15.02 per day, or \$457 per month, which includes the cost of food, clothing, and health care. In FY 2015-16, 63% of Class E felony offenders received active sentences averaging 79 months. For every one Class E felony offender receiving an active sentence, the cost to the prison section will be \$12,339 (\$457 monthly cost times 27 months).

Department of Public Safety – Community Corrections

All misdemeanor offenders may be given non-active (intermediate or community) sentences exclusively, or in conjunction with imprisonment (split-sentence). Sanctions include electronic house arrest, community service, substance abuse treatment, participation in educational or vocational skills development, payment of court costs, fines, and restitution, and short-term jail sentences not exceeding six days per month.

JRA essentially eliminated the distinction between “community” and “intermediate” supervision. Under structured sentencing, the two types of supervision were each defined by a set of specific sanctions. Under JRA, both community and intermediate probation may now include electronic monitoring, short-term periods of confinement, substance abuse assessment, monitoring, and treatment, participation in educational programs or vocational skills development. Whether a probationer is subject to more stringent conditions is determined by the results of a risk-needs assessment administered by the Department of Public Safety.

All types of post-release supervision, including intermediate or community sanctions, are supervised by the Community Corrections (CCS); CCS also oversees community service. General post-release supervision and supervision of intermediate and community offenders by a probation officer costs \$148 per offender, per month; no cost is assumed for those receiving unsupervised probation, or who are only ordered to pay fines, fees, or restitution. Total costs are based on average supervision length and the percentage of offenders (per offense class) sentenced to active sentences requiring post-release supervision, intermediate sanctions and supervised probation.

In FY 2015-16, 35% of Class A1 misdemeanor offenders received active sentences; 65% received probation. Active misdemeanor sentences are served in local jails and do not require any post-release supervision. The average length of probation imposed for this offense class was 17 months. Therefore, at a minimum, one Class A1 misdemeanor conviction resulting in probation will require at least 17 months of supervision. The cost of 17 months of supervision is \$2,516 per offender (\$148 per month times 17 months).⁴

In FY 2015-16, 15% of Class I felony offenders received active sentences. All active sentences for Class F through I felonies result in nine months of post-release supervision (PRS). The average length of probation imposed for this offense class was 23 months. Therefore, at a minimum, one conviction resulting from this bill will require at least nine months of supervision. The cost of nine months of supervision is \$1,332 per offender (\$148 per month times nine months).⁴ For every offender sentenced to probation, the average cost would be \$3,404 (\$148 per month times 23 months).

In FY 2015-16, 35% of Class H felony offenders received active sentences. All active sentences for Class F through I felonies result in nine months of post-release supervision (PRS). The average length of probation imposed for this offense class was 27 months. Therefore, at a minimum, one conviction resulting from this bill will require at least nine months of supervision. The cost of nine months of supervision is \$1,332 per offender (\$148 per month times nine months).⁴ For every offender sentenced to probation, the average cost would be \$3,996 (\$148 per month times 27 months).

In FY 2015-16, 63% of Class E felony offenders received active sentences. All active sentences for Class E felonies result in 12 months of post-release supervision (PRS). The average length of probation imposed for this offense class was 33 months. Therefore, at a minimum, one conviction resulting from this bill will require at least 12 months of supervision. The cost of 12 months of supervision is \$1,776 per offender (\$148 per month times 12 months).⁴ For every offender sentenced to probation, the average cost would be \$4,884 (\$148 per month times 33 months).

⁴ Due to the effective date of December 1, 2017 and the typical lag time between charge and conviction (6 months), little impact is assumed for CCS in FY 2017-18. Though some offenders may come under CCS supervision during this time, this note assumes an even entry over the course of FY 2018-19.
