FISCAL IMPACT SUMMARY:

The proposed bill may have a fiscal impact to address a new chargeable offense being enforced, adjudicated, and having penalties applied to those convicted of the new offense. However, given that there is no historical data on this new offense or similar offenses to use as a proxy for predicting the total number of new offenses, the Fiscal Research Division cannot reasonably estimate the total additional costs that may be incurred. The following costs may be incurred for every one person charged and convicted of this crime:

- Administrative Office of the Courts: \$34,104 per disposition
- Indigent Defense Services: \$4,183 per disposition
- Department of Public Safety (DPS) - Prisons: \$120,191

Please see the Assumptions and Methodology section for additional information.

BILL SUMMARY:

This bill creates a new subsection (a1) of G.S. 14-17 (Murder in the first and second degree defined). Under subsection (a1), a murder committed against one of the listed victims (a spouse, former spouse, a person with whom the defendant lives or has lived as if married, a person with whom the defendant is or has been in a dating relationship as defined in G.S. 50B-1(b)(6), or a person with whom the defendant

shares a child in common), with malice as required for second degree murder (G.S. 14-17(b)(1)), is presumed to be a “willful, deliberate, and premeditated killing” and therefore first degree murder if the perpetrator has previously been convicted of one of six listed domestic violence and stalking offenses involving the same victim. The defendant may present evidence to rebut the presumption.

ASSUMPTIONS AND METHODOLOGY:

General

The Sentencing and Policy Advisory Commission prepares prison population projections for each bill containing a criminal penalty. The Commission assumes for such bills that expanding existing or creating new criminal offenses produces no deterrent or incapacitative effect on crime. Therefore, the Fiscal Research Division does not assume deterrent effects for any criminal penalty bill.

S.L. 2011-192 (H.B. 642), the Justice Reinvestment Act (JRA), made changes to North Carolina’s court system, corrections system (both to prisons and probation), and to post-release supervision. All active sentences for felony offenses now result in a minimum of twelve months of post-release supervision (PRS) for B1-E level offenses and a minimum of nine months of PRS for F-I level offenses.

There is no data available on prior convictions that would move from a Class B2 to a Class A. According to the Sentencing Commission, the proposed change would result in a long-term impact on the prison population due to the longer sentence lengths for Class A convictions.

Judicial Branch

The Administrative Office of the Courts provides Fiscal Research with a fiscal impact analysis for most criminal penalty bills. For such bills, fiscal impact is typically based on the assumption that court time will increase due to anticipated increases in trials and corresponding increases in workload for judges, clerks, and prosecutors. This increased court time is also expected to result in greater expenditures for jury fees and indigent defense.

Section 1 of the bill creates a new Class A felony offense. Because this is a new offense, AOC does not have historical data upon which to estimate the number of charges that might occur. AOC provides estimates of the average cost to the court for a charge by offense class. For every additional person charged with a Class A felony, the average cost to the court would be \$34,104.

The Office of Indigent Defense Services (IDS) has provided Fiscal Research with the frequency and cost of indigent defense services for each level of crime, including the cost differentials for district and superior court with and without a trial and the percentage of cases handled in each category. Fiscal Research used this data to calculate a weighted average of IDS costs. In FY 2011-12, the most recent year data is available, 95% of Class A felony cases were handled through IDS. The weighted average cost of a new Class A felony is \$4,183 per case for a private appointed counsel (PAC) attorney. This estimate assumes the appointment of a PAC attorney. In districts that have Public Defender offices, cases may be handled by those offices. In those instances, this cost may not be incurred.

Department of Public Safety – Prisons

The chart below depicts the projected inmate population relative to available prison bed capacity system-wide. Capacity projections assume operation at Expanded Operating Capacity,¹ and represent the total number of beds in operation, or authorized for construction or operation as of December 2016.

Based on the most recent population projections and estimated bed capacity, there are surplus prison beds available for the five-year fiscal note horizon and beyond. Therefore, no additional beds will be required unless the projected number of additional inmates resulting from a bill (row four) exceeds the projected number of beds under the inmate population (row three).

Population Projections and Bed Capacity Five Year Impact					
	June 30 2018	June 30 2019	June 30 2020	June 30 2021	June 30 2022
1. Inmates ²	37,304	37,601	37,367	37,385	37,642
2. Prison Beds (Expanded Capacity)	38,373	38,373	38,373	38,373	38,373
3. Beds Over/(Under) Inmate Population	1,069	772	1,006	988	731
4. Additional Inmates Due to this Bill³	No estimate available				
5. Additional Beds Required					

Since the bill creates a new offense, the Sentencing Commission does not have any historical data from which to estimate the impact of this bill on the prison population. A threshold analysis is provided when it is not known how many offenders might be convicted and sentenced as a result of the proposed change. For each offense class, the threshold estimate is the number of convictions that result in the need for one prison bed in the first year.

In FY 2015-16, 100% of Class A felony convictions resulted in active sentences, with an average estimated time served of 263 months. The following table shows the estimated annual impact if there was one conviction (the threshold) or 20 convictions for this proposed offense per year. The five year estimate takes into account the active sentences, as well as growth rates adopted by the Sentencing Commission’s Forecasting Technical Advisory Group.

Estimated Prison Bed Impact Using Threshold Convictions and 20 Convictions Class A Felony					
Convictions	Year 1	Year 2	Year 3	Year 4	Year 5
1 (Threshold)	1	2	3	4	5
20	20	41	61	82	102

¹ Expanded Operating Capacity (EOC) is: 1) the number of single cells housing one inmate, 2) the number of single cells housing two inmates, and 3) the number of beds in dormitories, allowing between 35 (130% of Standard Operating Capacity) and 50 (SOC) square feet per inmate.

² The Sentencing and Policy Advisory Commission prepares inmate population projections annually. These projections are derived from: historical information on incarceration and release rates under Structured Sentencing; crime rate forecasts by a technical advisory group; probation and offender revocation rates; and the decline (parole and max-outs) of the stock prison population sentenced under prior sentencing acts. Projections were updated in February 2017.

³ Criminal penalty bills effective December 1, 2017 should not affect prison population and bed needs until FY 2018-19 due to the lag time between offense charge and sentencing - six months on average. No delayed effect is presumed for the Court System.

In addition to the capital costs that may be associated with additional bed needs, there are also per diem costs for housing inmates. The cost to add one additional inmate to the prison system is \$15.02 per day, or \$457 per month, which includes the cost of food, clothing, and health care. In FY 2015-16, all Class A felony offenders received active sentences averaging 263 months. For every one Class A felony offender receiving an active sentence, the cost to the prison section will be \$120,191 (\$457 monthly cost times 263 months).
